

# Darker versions of the university's pastel colours

---

When working with graphics, you can use this slightly darker colour scale when necessary.

If you are working in the Adobe package, a colour file (ASE file) with these darker swatches is available for download from the Staff Pages:

[www.staff.lu.se/colours](http://www.staff.lu.se/colours).

If you need lighter shades, use the normal profile colours at 50 per cent.

Original colours	Darker versions	R	G	B	Hexadecimal
		219	173	177	DBADB1
		164	196	207	A4C4CF
		153	190	167	99BEA7
		203	197	169	CBC5A9
		180	168	154	B4A89A

You can use the Hex code to quickly obtain the correct colour in Photoshop and Illustrator.
