

LUNDS
UNIVERSITET

Vice-Chancellor

DECISION

1(2)

8 May 2001

Reg no: I C 1 5753/2000

Parking policy for Lund University

Lund University adopts the following regulations, applicable from 1 July 2001.

Purpose

Lund University shall supply car parking spaces for employees and students within the area of the university.

Current demand will be the deciding factor in the planning, organisation and operation of the university's parking facilities.

The parking facilities shall be operated so that the costs for organising and operating parking spaces are covered by income from the sales of permits and tickets.

Problems due to aesthetics, the environment and traffic safety in association with the parking facilities shall be minimised.

Scope

All parking spaces at the university, i.e. on land that is part of the university areas in Lund, Malmö and Helsingborg, comprise a common resource and are covered by this decision.

Allocation of responsibility

The Division of Buildings is responsible for overall traffic and parking planning, rental of parking areas, consultation with other parties active in the parking area and in consultation with the Service Unit for the university parking charges.

The Service Unit is responsible for operating the facilities, such as car park security, permit sales, signs, parking information etc.

Operation

A number of short-term parking spaces shall be arranged at the university's most important locations for external visitors, such as the main university building, student union building etc.

Service card issues will be subject to a means test.

Environment

University parking facilities shall be planned, organised and operated in accordance with adopted environmental targets.

Different methods, such as the introduction of work bicycles, active fees policies and contributions to improved public transport, shall encourage the use of environmentally friendly transport.

Motor vehicles and permanent car parking are not permitted on pedestrian and cycle paths and within university parks.

The university shall actively promote more environmentally friendly commutes to work.

Consultation

It is the task of the Division of Buildings to consult and cooperate, as regards charges, policy and operations, with parties to parking spaces in the surrounding area.
